Top 3 Tips for Mastering the Content

1. **Don't just watch passively:** Pause the videos when they introduce a problem. Try to draw out the architecture yourself before they reveal the answer.
2. **Focus on Trade-offs:** The interviewer doesn't want a "perfect" system; they want to hear you debate the pros and cons of your choices (e.g., SQL vs. NoSQL, Consistency vs. Availability).
3. **Read the Book:** If you want to go deeper, grab Alex Xu's book, *System Design Interview: An Insider's Guide*. It pairs perfectly with the video content.
